

Architectural Visualiser/Technician

We are looking for a passionate and exceptional visualiser who can comfortably take concept designs and turn them into beautiful images. At times, when not doing visualisation work, the job will include architectural modelling using Revit.

Chetwoods is an award-winning international architectural practice based in London, Birmingham, Germany and China. We work across a variety of sectors including residential, commercial, industrial, mixed-use and workplace.

Our architecture teams use rigorous thinking and radical creativity to push the possibilities of design for living, and bring more colour to the world.

We have three elements to our approach; Studio, Thrive and Works.

Studio puts the imagination, emotion and instinct into our designs. Thrive supports the design and delivery of projects that will enhance our environment and improve our health and wellbeing. Works champions the digital delivery of projects. It provides support to our teams in the use of appropriate and innovative software and hardware to deliver sustainable architecture.

At Chetwoods we are always pushing the boundaries of what is possible. We designed the world's first net zero carbon for construction verified building, the world's first BREEAM 'Outstanding' logistics building, the world's first fully automated food retail distribution centre, the most technically advanced container port in the world and Europe's largest dedicated logistics park – where there is innovation, we are always at the forefront. This is because our clients are open minded and on-board with us thinking outside the box to challenge the status quo and push for design that reaches new milestones in our industry.

This is an exciting opportunity for a forward-thinking designer with ambition who wants to push the limits of what is currently possible and deliver spaces that not only make the headlines, but also create a positive physical, sensory and human experience.

Job Description

The role will primarily be based with one of our London office teams, but may involve occasional work with our other teams in Birmingham and internationally. We are currently hybrid working with the week split between the office and working from home (subject to current COVID-19 advice at the time of application).

Essential Skills and Experience:

- Working closely with the project teams to develop imagery which supports and sells schemes.
- Thorough knowledge of efficient workflows between software.
- Preparation of detailed drawings and specifications for tender and construction.
- Ability to interpret sketch designs and turn into convincing visualisations.
- Exceptional modelling and visualisation skills.
- Professional qualification in the field of architecture or design with +3 years' experience of working in architecture.
- Proficiency in Revit, AutoCAD, Enscape, 3DS Max, V-Ray (for Revit or Rhino).
- Proficiency in Adobe Photoshop for post-production work.
- Exceptional written and verbal skills.
- Excellent interpersonal and time management skills.
- Able to work to tight deadlines.
- Knowledge of UK Building Regulations.

Desirable:

- Experience with a set of applications including Twinmotion, FormIT
- Experience with computer programming
- Computational design software

Salary: Excellent salary - negotiable depending on experience

To apply, please send your CV using the email address below enclosing a covering letter and portfolio of no more than 10MB size. We are only able to respond to candidates we invite for interview, but we keep CVs on file for 6 months and may get in touch at a later stage.

Chetwoods prides itself on being an equal opportunities employer and all candidates will be treated fairly regardless of age, race, sex or disability.

No agencies at this time please.
